

How to Compare ~~the~~ Decimals

Sometimes, we need to compare or put decimals in to order (either from least to greatest or greatest to least.)

~~Let~~ We are going to put the following decimals in order from least to greatest.

0.7, 0.25, 0.4, 0.875

To put these numbers in order, we will:

1.) Make a p/v chart

2.) Plug in the numbers, add

Zeros as needed

3.) Compare all digits
in the ones column.

Cross out all digits
with the highest value.

4.) Compare all digits in
the tenths column.

5.) Write our decimals
in order. (Be sure
to write the decimals
in their original form!)

O	t	h	th	
0	7	0	0	3
0	2	5	0	1
0	4	0	0	2
0	8	7	5	4

0.25, 0.4, 0.7, 0.875
